

Students may be issued (or assigned) District owned device(s) (i.e., Chromebooks, iPads, etc.) in order to enhance their learning experience. This is a privilege that can be revoked. All devices are to be returned upon withdrawal of student from the District or upon high school graduation. Homeschooled students may use a school-issued device provided they are still residing in the District.

Students are expected to respect the District's property and be responsible for the use and care of the equipment. Students are to follow any District instructions regarding maintenance and care of the equipment. The District is responsible for any routine maintenance and standard repairs to district devices. Students are responsible for any and all damages to their assigned device(s), regardless if the damages are accidental or otherwise. Students are expected to timely and properly notify the District of any need for service.

The District may offer Chromebook insurance on an annual (yearly) basis to cover the repair costs of accidental damage. Students and their families are expected to cooperate with district staff and its insurance agent and insurance carrier to provide complete information regarding the loss or damage, if applicable.

The District will create procedures for the deployment and collection of devices, the processing of insurance claims, the issuance and collection of fees for non-insured damages, and/or the non-return of devices, as well as possible disciplinary action.
